

THARANA HASINTHA

Software Engineering Undergraduate
University of Westminster (IIT)

Phone: +94 70 147 1703 **Email:** tharanahasintha@gmail.com

Location: Colombo, Sri Lanka

[LinkedIn](#) [GitHub](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Motivated Software Engineering undergraduate with hands-on experience in full-stack web development and enterprise application development. Proficient in Java, Python, Spring Boot, Hibernate, Maven, React.js, and modern web technologies with strong understanding of SDLC, RESTful APIs, MVC architecture, and Agile methodologies. Skilled in building scalable, user-focused software solutions with proven track record in database management, API integration, and responsive UI/UX design.

Education

University of Westminster (IIT) <i>BEng (Hons) in Software Engineering</i>	2024 – Present
Mahanama College, Colombo – G.C.E (Advanced Level) <i>Physical Science Stream: Combined Mathematics – C Chemistry – C Physics – S</i>	2023

Skills

Technical Skills

- **Programming Languages:** Java SE/EE, Python, JavaScript, PHP, C++, Node.js
- **Web Development:** React.js, HTML5, CSS3, JavaScript, JSP, Servlets, REST APIs
- **Frameworks & Libraries:** Spring Boot, Hibernate, Maven
- **Database Management:** MySQL, PostgreSQL, Firebase, OracleSQL
- **Tools & Platforms:** Visual Studio Code, Spring Tool Suite, IntelliJ IDEA, Eclipse, Apache Tomcat, Payhere
- **Version Control:** Git, GitHub
- **Data Formats:** JSON, XML
- **Architecture & Design Patterns:** MVC, DAO Pattern, Microservice Architecture

Personal Skills

- Communication
- Problem solving
- Teamwork
- Analytical thinking
- Leadership

PROFESSIONAL QUALIFICATIONS

Industrial / Enterprise Software Development Program

- Advanced training in Java SE, Java EE, Spring Boot, Maven, Python, and industrial frameworks with practical exposure to enterprise-level software architecture and coding standards

Languages

- English (Professional)
- Sinhala (Native)

PROJECTS

Microservices-Based E-Commerce System (Individual) | 2026

Technologies - Spring Boot, REST APIs, MySQL, JWT, Google OAuth, Kafka, Docker, Git, API Gateway, PayHere Sandbox

- Developed a microservices-based e-commerce application with modules for authentication, product catalog, order management, Order tracking, payment processing, and notifications
- Implemented secure authentication and authorization using JWT, BCrypt, and Google OAuth
- Integrated payment gateway API (Payhere) and designed RESTful APIs with API Gateway for centralized request routing and management

Full-Stack Online Library Management System with Library Assistant Robot (Group) – Librioo | 2026

Technologies - Spring Boot, React.js, MySQL, REST APIs, Maven, Git, Firebase, Firebase Realtime Database, Firebase Firestore, Firebase Authentication, Node.js, Hibernate, IoT, Railway

- Developed a full-stack library management system with a library assistant robot, featuring role-based authentication using Firebase Auth, a React.js admin dashboard with protected routes, and real-time activity logging to Firestore.
- Implemented RESTful APIs using Spring Boot for book management, real-time robot navigation via Firebase Realtime Database, and deployed the backend to Railway with secure environment-based configuration.

Online Voting System (Individual) – SmartVoteSL | 2025

Technologies - HTML5, CSS3, Node.js, JavaScript, Firebase, QR Code API

- Independently developed full-featured smart election platform with voter registration system and QR code-based authentication.
- Integrated email authentication and real-time vote counting functionality with admin panel for candidate management.

Dynamic Email Client Application (individual) - Offline Gmail Clone | 2025

Technologies - Java, JSP, Servlets, JDBC, MySQL, MVC, Apache Tomcat, Eclipse/STS

- Built dynamic email client replicating Gmail core features including registration, composing CC/BCC, drafts, inbox, sent items, and junk management. Implemented MVC architecture and DAO design pattern for clean code separation, improving code maintainability by 30%.
